## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

The abstract of the disclosure is objected to because of the inclusion of legal language, i.e., "comprising" and should be more than one sentence. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The disclosure is objected to because of the following informalities: On page 1, line 7, "Figure 3" should be --Figures 3(a) and 3(b)-- and on page 3, line 13, "Figure 1" should be changed to --Figures 1(a) and 1(b)--.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hags.

Hags discloses guide rails for conveying a band form member comprising a pair of guide rails (4) comprised of rail main bodies (i.e., lower guide structure) and guide assemblies (20) and (i.e., upper guide structures) forming width direction guide elements (20) and vertical direction guide elements (i.e., upper guide structures) that partially guide an upper surface of said band form member due to the space between the upper guide structures.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
